Storm Passes Away
Jake Bugg

Capo1st fret = original key

```
E                                A                          B7       E
As the clouds roll by - I can see the sunshine --- Mmmhmmm

'Cause it's sad and slow - and oh so close
            B7
We fell together - and made our way
       E                     A
But now it seems - you don't need me
                    B7                              E
Where will you go when the storm passes away

'Cause I'm on my knees -Turn off the darkness please
                    B7
Where will you go
              E                          A
And they keep telling me - I'm older than I'm supposed to be
           B7                              E
You will go when the storm passes away

D                   A                    E
I'll keep the storm if I can keep you
D                   A               E
I'll live in the rain if you will too
D                    A         E                        B7
We can ride together - We can ride the weather

                 E
'Cause I've lost my stance - Just like a fallen man
            B7
Oh the things - I've hoped you would say
            E                            A
Your radiance runs deep - in my colour scheme
                     B7                                  E
Where will you go when the storm washes you away

Ch
                     A                 B7                E
Where will you go when the storm passes away
```
