Meet Me In McCall
Tab And Lyrics
By Brenn Hill

Intro – Am-C-G-Am-C-G-G/Db-G

```
                  C                                G
If you have the power - where you are right now
                           Am            D
To change the seasons back – somehow
           Bm     C                   G   Em
To highway 95 - Cool September rain
                 Am    C       D
If you could be alive …… again

                        G  G/Db   G                          Am
Then meet me in McCall ---------- And make it early fall
          C                                   D
Bring a good horse - and a rifle and that's all
                          Bm    C                                G   Em
We'll ride the golden Aspen Trail - 'Neath timber dark and tall
                 Am     C                 G
So meet me in McCall - In the early fall
```

Intro – Am-C-G-G/Db-G

```
                          C                                G
Thought I heard your voice - Out on the oak brush rim
                        Am                              D
Cold rush upon my face - But it was just the wind
                          Bm     C                                G   Em
And a bugle down the draw ---- From somewhere in the pines
                        Am    C                         D
Like twenty years ago ------- Branded on my mind

                        G  G/Db   G                          Am
Somewhere above McCall ---------- And it was early fall
          C                                   D
Bring a good horse - and a rifle and that's all
```

```
                          Bm    C                                  G   Em
We'll ride the golden Aspen Trail - 'Neath timber dark and tall
Am     C                  G
So meet me in McCall - In the early fall

C       A6                 Am G     C                   D
And I wish - I could disappear - Every now and then
Bm    C                      G                          C
Not a day goes by that I don't wish -  you were here
F                            D
So I could tell you once again

                        G  G/Db   G                          Am  Am/G   Am
Then meet me in McCall ---------- And make it early fall
          C                                  D
Bring a good horse - and a rifle and that's all
                          Bm    C                                  G   Em
We'll ride the golden Aspen Trail - 'Neath timber dark and tall
                  Am     C                  G   Em
So meet me in McCall - In the early fall
                Am   C    G
Meet me in McCall
```
